

CARTES is the winner for best technological innovation at the Label Industry Global Awards 2023.

"The history of CARTES is written by brave and extraordinary people.

Starting with my grandmother Zita Bergonzoni, who in 1948, after the war, carried on the business of her husband, who died prematurely, alone and with 3 young children.

Following my father Mario Lodi who, with my cousin Carlo Stefano Lodi, evolved the company into the production of machines with increasingly advanced technology.

All of us who today are CARTES, a wonderful and unique STAFF, a family, a universe, who, with passion, give our best by always exploring new paths leaning towards improvement.

Improvement as a philosophy of life.

To receive this award is an immense and unique satisfaction.

A recognition for years of passion and hard work of a great staff that is really more than just a team, is beautiful family.

An ending point to start again the race of innovating more and more.

A dream pursued hardly without ever wavering or giving up.

This award belongs to all the fantastic people who have written and who write the history of CARTES every day.

Thank you all!!!"

Enrica Lodi
